

Transform traditional SSL (both free and paid) sales through the Sectigo Web Security Platform by offering a single security product that provides 360 degree website protection

All in One Security Platform that Grows with You and Your Customers

Sectigo Web Security Platform enables our partners to differentiate and increase revenue by multiple solutions via an easy to use, all in one API

PRODUCT PLANS

Sectigo Web MONITOR

Scans daily and automatically to monitor your websites and databases for security issues such as malicious infections, spam listings, vulnerabilities, network port issues, blacklisting and more.

Sectigo Web REMEDIATE

Detects and automatically patches weaknesses in exploitable codes in your content management system (CMS) or database before cybercriminals can exploit them.

Sectigo Web PERFORM

Automatically removes active infections from website files and databases including malware, SEO spam, redirect infections, unwanted java script files, cryptomining scripts, backdoor files, and more.

NEW SECTIGO SSL BUNDLES

Sectigo is now also offering new SSL Certificates that include these packages at different levels.

will include the Sectigo Web Monitor package in addition to the SSL certificate.

will include the Sectigo Web Remediate package in addition to the SSL certificate.

will include the Sectigo Web Perform package in addition to the SSL certificate.

PRODUCT FEATURES

WEB DETECT

Scans daily and automatically to monitor your websites and databases for security issues such as malicious infections, spam listings, vulnerabilities, network port issues, blacklisting and more.

WEB PATCH

Detects and automatically patches weaknesses in exploitable codes in your content management system (CMS) or database before cybercriminals can exploit them.

**WEB REPAIR**

Detects and automatically patches weaknesses in exploitable codes in your content management system (CMS) or database before cybercriminals can exploit them.

**WEB BACKUP & RESTORE**

Reverse damage caused to a website through a 1-click restore option. Utilizing sophisticated version control software, Web Backup & Restore provides incremental agent-less backups, and empowers users to oversee their network of websites – with any mix of CMSs: WordPress, Joomla, Drupal – all in one place.

**WEB ACCELERATE (CDN)**

Our high-performance Content Delivery Network (CDN) enables your website to be delivered from all over the world at lightning speeds. Utilizing Sectigo Web Accelerate also enables automatic renewal of your SSL certificate(s) when purchasing Sectigo Subscription SSL bundles.

**WEB FIREWALL (WAF)**

Ensure zero disruption to sites or user experience with sophisticated web application protection, infrastructure protection, and DNS protection that protects your website from DDoS attacks, bad bots, and other malicious threats.

**WEB COMPLY**

Automate, simplify and attain PCI compliance quickly by eliminating threats and securing your network with our simplified scans and remediation solution.

PARTNER BENEFITS

Scale your business with a modular web security platform that seamlessly integrates products and services providing your customers with comprehensive 'set-it and forget-it' protection.

COMMUNITY WIDE SECURITY

Stop 'bad neighbor' threats and malicious code infections with server-level monitoring for you while your customers enjoy site level detection, remediation and prevention.

CENTRALIZED MANAGEMENT

Control your offerings and how security issues are handled all within a single pane of glass portal providing the ability to view and toggle on/off services on a need basis.

SCALABLE MODULAR

Whether stand-alone or bundled our security features are comprehensive, managed, fully integrated and future proof - growing with you and your customers.

HANDS OFF AUTOMATION

Automated or scheduled scans allow for a simple 'server check in' on its overall security while providing automatic monitoring, remediation and protection for your customers websites.

SEAMLESS INTEGRATION

Frictionless provisioning, shorten time to market and eliminate tedious billing tasks with a single API alongside supported system plugins for cPanel, WHMCS and Wordpress.

BRAND POWER

Co-brand or white label, provide a cohesive customer branding experience with a complete solution.

FRICTIONLESS UPSELL

Increase revenue streams with automated upsell, renewal and direct sales opportunities by automating the delivery of products.

REVENUE STREAMS

The additional product features that the Sectigo Web Security platform offers can help increase your revenue all from an easy to work with a single vendor.

INTEGRATION

SINGLE API

A Single, Simple API Enables Quick Implementation

Partners can now integrate new products within days as opposed to months. With one API for multiple products, product implementation has never been easier. Our new, single API makes requesting not only our range of Web Security Products but also any existing SSL's as well as any new products easier than ever. This single API reduces product implementation from weeks or months to hours or even minutes.

ADDITIONAL PLUGINS

WHMCS

Eliminate tedious billing tasks and reduce support costs while increasing revenue streams with automated upsell, renewal and direct sales opportunities with our WHMCS module that automates the delivery of the Sectigo security product portfolio.

cPanel

Remove the friction of provisioning security features and shorten the time to market of new security products with the integration of cPanel & WHM for a seamless customer experience. Automatically protecting millions of websites.

WORDPRESS

Got WordPress? Tapping into the WordPress security market share is essential for your bottom line. CodeGuard by Sectigo has you covered with plugins that secure and protect data by enabling WordPress with time machine backup system.

GETTING STARTED

Step 1 (Upgrade SSL): The Sectigo Web Security Platform provides three levels of protection focused on different areas of website protection. Choose one or all three plans and increase revenue by offering affordable and comprehensive security products for resolving a complex and ever evolving problem.

EVERY PRODUCT INCLUDES

- Sectigo Branded SSL Certificate
- 24/7 US based technical support for pre- and post-sales support across the globe.
- Website Warranty
- Entry level plans with options for upsells
- Sectigo Trust Seal to boost visitor confidence

Step 2 (Select Plans): As a reseller of the products you'll be able to offer any of the three plans that you wish to sell. Each of the packages and product features provide a unique feature set tailored to provide the right level of security to your customers.

Step 3 (Launch): Armed with new security solutions for your clientele, Sectigo will provide you with marketing assets, best practice launch campaigns, and expertise in both checkout flow integrations as well as promoting to current customers. Enjoy a true partnership with your dedicated Sectigo Channel Marketing team.
