INTRODUCTION

Sectigo can only issue qualified certificates according to this document and the profiles defined. All certificate profiles within the qualified hierarchy of Sectigo are detailed below.

Additionally, specific certificate policies and Sectigo liability arrangements that are not described in the qualified CP/CPS may be drawn up under contract for individual subscribers.

Different certificate profiles may be issued with different key usages.

LOCAL DEVICE

These certificates are issued locally, either in a QSCD for those issuing qualified signatures/seals that is securely delivered to the subscribers or in a non-QSCD for those issuing advanced signatures/seals which do not use any qualified device and the issuance process can be done online entirely.

Notes

Subject fields

One of either subject:locality (L) or subject:stateOrProvince (S) is required.
subject:stateOrProvince is preferred to be included.

qcCompliance

This is the only qcStatement mandatory according to ETSI EN 319 412-5

qcRetentionPeriod

- eIDAS does not impose any specific time, just what is considered valid. Article 24 2h.
- ETSI EN 319 411-1 indicates 7 years in clause 6.4.6
- Spanish signature law indicates 15 years as per Article 20 f.

This is a generic qcStatements that **may** be used with any applicable regulatory framework as indicated in ETSI EN 319 412-5

qcPDS

- eIDAS does not impose the use of this PDS (PKI Disclosure Statement)
- ETSI EN 319 411-1 Annex A shows an example of a PDS. It´s informative. The intention is to help consumers understand the rights, obligations, etc. that may not be easily to find/understand in the CP/CPS. It´s just a short document to explain this information
- Spanish signature law does not say anything about it.

This is a generic qcStatement that **may** be used with any applicable regulatory framework as indicated in ETSI EN 319 412-5.
