

eIDAS certificates from Sectigo

eIDAS (electronic IDentification, Authentication and trust Services) is an EU regulation for electronic transactions in the European Single Market. Sectigo provides certificates and timestamps that meet eIDAS requirements, including qualified signatures, seals, and trusted authentication. Certificates can be used to generate signatures and seals that ensure the legality of electronic transfers between citizens, businesses and government authorities across European Union markets. eIDAS certificates provide trusted assurance of authentication for electronically transmitted documents by validating author and document.

These certificates enable individuals and organizations (depending on the type purchased) to electronically sign or seal PDF and other documents in compliance with the eIDAS regulation. The certificate verifies the signatory's identity and authenticity of the document. The eIDAS regulation provides a recognized standard and chain of trust. It is primarily used within the European Union.

Sectigo provides a comprehensive portfolio of eIDAS products to support the needs of individuals, businesses and government entities, providing a single trusted provider for digital identity needs. Sectigo's local presence in many countries throughout the world enables it to more easily deliver eIDAS products where they are needed.

Qualified eIDAS signatures provide a higher degree of assurance and can hold the same legal effect as a handwritten signature. It requires a qualified certificate stored on a qualified signature creation device and must be issued and managed by a Qualified Trust Service Provider.

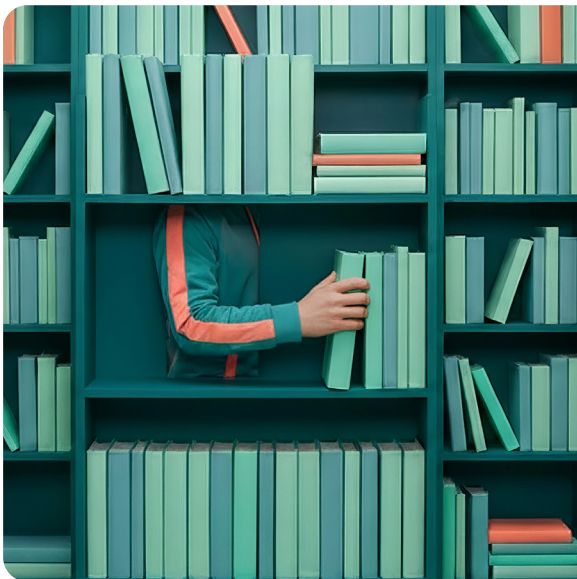

Qualified certificates from Sectigo enable individuals and organizations to sign or seal documents and meet eIDAS requirements.

Sectigo is a Qualified
Trust Service Provider
of eIDAS products

eIDAS seals & signing certificates provide the following features:

- ✓ Compatibility with a range of signing applications such as Adobe products
- ✓ Support for authenticity and non-repudiation for the lifetime of the document
- ✓ Sectigo is an accredited Qualified Trust Service Provider under eIDAS regulations
- ✓ SHA-2 Signing and 2048-bit encryption for enhanced security
- ✓ Certificates for qualified signatures and seals are provided on a secure USB token
- ✓ Qualified Certificates issued to individuals can also be used for signing emails
- ✓ eIDAS Seal Certificates issued to legal persons can also be used for code signing

Sectigo provides eIDAS certificates for:

Individuals

Advanced and Qualified Electronic Signatures commonly used for personal identification, tax filing, and government requirements. Qualified Electronic Signatures are in the name of an individual and have the same legal effect as handwritten signatures.

Organizations

Advanced and Qualified (QSCD) Signatures and Seals for Employees and Organizations. Used for calls for tender, business documents, automated processing and more.

eIDAS products

Sectigo provides a broad range of eIDAS products including:

Signatures and seals

eIDAS compatible document signing and sealing certificates provide trusted assurance of authentication for electronically transmitted documents by validating author and document.

Qualified website authentication certificates (QWAC)

QWACs attest to the fact that behind a website or server there is a natural or legal person identifiable by trustworthy information. The certificates encrypt data using encryption and algorithms and provide extended validation to identify EU organizations or individuals to users.

PSD2 certificates

PSD2 is a regulatory framework to ensure that payments across the EU are secure, easy, and efficient. PSD2-compliant certificates can only be issued to legal persons that have a PSD2 authorization number as issued by a National Competent Authority (NCA).

eIDAS requirements can be confusing both in terms of the certificates required and how they are employed to meet specific needs. Sectigo has more than 20 years of experience in specifying and applying eIDAS certs and can provide assistance to individuals and enterprises in finding the correct certificate types.

PSD2 products

Sectigo provides PSD2 certificate products for financial organizations.

These products include:

- ✔ **PSD2 seals for organizations**
PSD2-compliant qualified and advanced seals—for banking entities, third-party payment providers and other financial organizations that need to comply with PSD2.
- ✔ **PSD2 QWAC certs**
PSD2-compliant QWACs—TLS/SSL certificates that encrypt sensitive data and authenticate banking entities, third-party payment providers and other financial organizations for trusted electronic transactions on websites.

Whatever your application or requirements, Sectigo will help you choose the right certificate type for your purposes. For more information on eIDAS certs from Sectigo, please visit the Sectigo website or contact your local sales or partner representative.

About Sectigo

Sectigo is a leading provider of Certificate Lifecycle Management (CLM), helping organizations secure human and machine identities while reducing the hidden risks of modern digital trust. As certificate volumes grow and lifespans shrink, unmanaged certificates are becoming a source of outages, compliance exposure, and operational disruption. Sectigo uses Orchestrated Automation to deliver Simplicity at Scale through its cloud native CLM platform, bringing visibility, control, and lifecycle management together across complex environments. With more than 700,000 customers, including 65% of the Fortune 500, Sectigo is one of the largest and longest standing certificate authorities, with over 20 years of delivering unparalleled digital trust.
